Universal Design for All!

The DiFabion Remodeling family is excited to announce that our designers, Jackie and Jaclyn, have recently become Universal Design Certified Professionals (UDCP)! Universal design is about creating accessible spaces for all people, not only for those who wish to age-in-place but also for families with special needs and families that are forward thinking. A Universal Design Certified Professional goes through extensive training on how to interview clients with an understanding and consideration of their unique needs and how to incorporate universal design into remodeling projects. We are excited about all the possibilities universal design brings to the table and look forward to utilizing all that was learned throughout the rigorous course of providing the best service possible! Put our newly certified Universal Design Professionals to work with your next custom remodel.

TESTIMONIALS

"We are repeat customers of DiFabion Remodeling, having benefitted from their home remodeling services multiple times over the past 10 years. Mike and his team met with us to learn what we wanted out of the project and helped us by offering ideas. They have helped turn our house into a home."

- R.G. in Charlotte

PROJECT SPOTLIGHT

The existing kitchen was dated with golden toned finishes. Confined to a small footprint, the kitchen lacked storage space and an open connection to the formal dining room. Key features of the new design include a combined kitchen and dining room, an antique pine top island, a peninsula with seating, and a custom window seat with built-in charging stations. Finishes were updated with white perimeter cabinetry, a gray island, farmhouse sink, and mix of metal finishes including brushed nickel and bronze.

...with Jackie and Jaclyn

Our vision is to create a memorable brand experience while enhancing the quality of life for the clients we serve.

These days an overwhelming number of clients are interested in quartz countertops! Clients are discovering that quartz manufacturers have worked hard to create a product that is not only durable but visually pleasing. One company worth noting is Cambria. Manufactured entirely in America, Cambria quartz is harder than granite, making it more durable. Maintenance free, Cambria doesn't require polishing or sealing. The nonabsorbent surface, which doesn't harbor bacteria, and the jumbo slabs for seamless larger projects are just added bonuses.

OUR MISSION

Our mission at DiFabion Remodeling is to deliver an exceptional remodeling experience built on Trust, Vision, Pride, and Family, with the goal of exceeding our clients' expectations in every way.
